

PROFESSIONAL SOUND AND AUDIOVISUAL INTEGRATION

Houses of Worship

St. John Cantius Catholic Parish

This spoken-word system had to perform well without distracting from the parishioner's visual worship experience. Utilizing digitally-steered Line-Array Loudspeakers this was accomplished with ease.

“Working in cooperation with the firm performing our church interior restoration, Sound Planning was sensitive to our desire to respect the artistic decor of our 1893 church building. While our new sound is clear and even throughout the church, the speaker placement is discreet. This perfect combination is most agreeable. We are very satisfied with the audio improvements you have brought us. We heartily recommend others to work with Sound Planning for audio improvements.”

Rev. Scott A. Haynes, SJC, Associate Pastor
