

Valparaiso University

Resurrection Chapel—Completed 2014

Project Includes: Sound Reinforcement & Video Cameras

The Chapel of the Resurrection is the centerpiece structure on the campus of Valparaiso University in Valparaiso, Indiana. It has been described as the largest collegiate chapel in the United States and the second largest collegiate chapel in the world

The chapel's chancel is 98 feet (30 m) high and is circular in shape; the roof of the apse is shaped like a nine-pointed star. The nave is 58 feet (18 m) high and 193 feet (59 m) long. The building capacity is around 2000, although this number is flexible depending upon the configuration of the pews, which are moveable.

Primarily used to facilitate the many Lutheran campus worship services, the Chapel of the Resurrection also serves as a site for convocations, musical performances, guest lectures, and commencement ceremonies. (Pictured Above: Celebrating MLK, 2014)
